

DEXERYL[®]

Cream

Pierre Fabre
DERMATOLOGIE

For Topical Dermatological Use Only

Description

DEXERYL[®] Cream is a prescription-only white skin cream for topical dermatologic use that is used for burning and itching experienced with various types of dermatoses. DEXERYL[®] Cream also provides a moist skin environment.

Indications for Use - When is DEXERYL[®] cream used?

DEXERYL[®] Cream is indicated to manage and relieve the burning and itching experienced with various types of dermatoses including atopic dermatitis, allergic contact dermatitis and irritant contact dermatitis. DEXERYL[®] Cream provides a moist skin environment, which is beneficial to the healing process.

Direction for Use

DEXERYL[®] Cream is for external use only. Apply a thin layer of cream to the areas to be treated two times daily or as needed. Carefully close the tube after use.

Contraindications

This device is not to be used in the event of allergy or hypersensitivity to any of the constituents, particularly paraben (propyl parahydroxybenzoate). It is preferable not to combine the cream with other products for topical application. If in doubt, ask advice from a healthcare professional.

Warnings:

Do not swallow.

Do not apply to the eyes.

Keep away from children.

What are the possible adverse side effects?

Rare allergic skin reactions, such as eczema (inflammation) or urticaria (skin rash) may occur. Consult with your healthcare professional if unwanted or unpleasant effects occur.

Ingredients

DEXERYL[®] Cream contains Glycerin, Petrolatum, Mineral Oil, Glyceryl Stearate, Stearic acid, Cyclomethicone, Dimethicone, PEG 600, Triethanolamine, Propylparaben, and Purified Water.
